

**Certificate in Translation  
(2016-2017)  
Term End Examination  
December 2016**

**CIT-02: Functional Translation**

**Time: 3 Hours**

**Full Marks: 100**

**Section-A (Theory)**

**Full Marks: 50**

**(Weightage: 50%)**

*Answer all questions. Figures on the right hand margin indicate marks.*

1. **Answer two of the following questions in about 1000 words.** [20X2=40]
  - a. How are English and Odia different in terms of words, phrases and sentences? How do these differences matter when we translate from English to Odia?
  - b. What difficulties do we face while translating registers and technical terms? Explain with examples.
  - c. What things should we take into consideration while translating legal texts?
  
2. **Write notes on any one of the following.** [10]
  - a. Phrase structure in English and Odia
  - b. Using a bi-lingual dictionary for translation

**Section-B (Practice Component)**

**Full marks: 50**

**Weightage: 25%**

3. **Translate the following texts into Odia.** [25X2=50]
  - (a) I don't know where to begin my speech. I don't know what people would be expecting me to say. But first of all, thank you to God for whom we all are equal and thank you to every person who has prayed for my fast recovery and a new life. I cannot believe how much love people have shown me. I have received thousands of good wish cards and gifts from all over the world. Thank you to all of them. Thank you to the children whose innocent words encouraged me. Thank you to my elders whose prayers strengthened me. I would like to thank my nurses, doctors and all of the staff of the hospitals in Pakistan and the UK and the UAE government who have helped me get better and recover my strength.

I fully support Mr Ban Ki-moon the Secretary-General in his Global Education First Initiative and the work of the UN Special Envoy Mr Gordon Brown. And I thank them both for the leadership they continue to give. They continue to inspire all of us to action.

Dear brothers and sisters, do remember one thing. Malala Day is not my day. Today is the day of every woman, every boy and every girl who have raised their voice for their rights. There are hundreds of Human rights activists and social workers who are not only speaking for human rights, but who are struggling to achieve their goals of education, peace and equality. Thousands of people have been killed by the terrorists and millions have been injured. I am just one of them. So here I stand.... one girl among many.

I speak - not for myself, but for all girls and boys. I raise up my voice - not so that I can shout, but so that those without a voice can be heard. Those who have fought for their rights: Their right to live in peace. Their right to be treated with dignity. Their right to equality of opportunity. Their right to be educated. Dear Friends, on the 9th of October 2012, the Taliban shot me on the left side of my forehead. They shot my friends too. They thought that the bullets would silence us. But they failed. And then, out of that silence came, thousands of voices. The terrorists thought that they would change our aims and stop our ambitions but nothing changed in my life except this: Weakness, fear and hopelessness died. Strength, power and courage was born. I am the same Malala. My ambitions are the same. My hopes are the same. My dreams are the same.

Dear sisters and brothers, I am not against anyone. Neither am I here to speak in terms of personal revenge against the Taliban or any other terrorists group. I am here to speak up for the right of education of every child. I want education for the sons and the daughters of all the extremists especially the Taliban.

I do not even hate the Talib who shot me. Even if there is a gun in my hand and he stands in front of me. I would not shoot him. This is the compassion that I have learnt from Muhammad-the prophet of mercy, Jesus Christ and Lord Buddha. This is the legacy of change that I have inherited from Martin Luther King, Nelson Mandela and Muhammad Ali Jinnah. This is the philosophy of non-violence that I have learnt from Gandhi Jee, Bacha Khan and Mother Teresa. And this is the forgiveness that I have learnt from my mother and father. This is what my soul is telling me, be peaceful and love everyone. **(Excerpt from the Speech of Malala Yusufjai at the United Nations)**

- b. Thick black smoke curling out of smokestacks, horrible-tasting chemicals in your drinking water, pesticides in your food — these are examples of pollution. Pollution is any contamination of the environment which causes harm to the environment or the inhabitants of the environment. There are many kinds of pollution, and there are many pollutants. Some obvious kinds of pollution are pollution of the air, soil, and water. Some less obvious, or less salient, kinds of pollution are radioactive, noise, light pollution, and green-house gasses.

Air pollution can be caused by particles, liquids, or gases that make the air harmful to breathe. There are two main types of air pollution: primary and secondary. Primary pollutants enter the air directly, like smoke from factories and car exhaust. Secondary pollutants are chemicals that mix together to pollute the air, like mixtures of emissions, or waste output, from vehicles and factory smoke that change to form more dangerous pollutants in the air and sunlight.

Soil pollution can be caused by pesticides, leakage from chemical tanks, oil spills, and other chemicals which get into the soil by dumping or accidental contamination. Soil pollution can also cause water pollution when underground water becomes contaminated by coming into contact with the polluted soil.

Water pollution can be caused by waste products, sewage, oil spills, and litter in streams, rivers, lakes, and oceans. Some scientists believe that water pollution is the largest cause of death and disease in the world, causing about 14,000 deaths in the world each day.

Radioactive pollution can be caused by leaks or spills of radioactive materials. These materials can come from medical sources, nuclear power plants, or laboratories which handle radioactive materials. Air, soil, and water can be polluted by radioactivity. It can cause damage to animals, both internally and externally, by eating, drinking, or touching it. It can cause birth defects and genetic problems. It can cause certain cancers and other deadly diseases.

Noise pollution can be caused by vehicle, aircraft, and industrial noise. Noise has health effects on people and animals. In people, it can cause high blood pressure, heart problems, sleep disturbances, and hearing problems.

It is not possible for anyone to predict the exact timing and effects of global pollution and global climate change brought about by pollution. There is general agreement by scientists that the global climate will continue to change, that the intensity of weather effects will continue to increase, and that some species of animals will become extinct. There is also general agreement that humans need to take steps to reduce emissions of waste products and greenhouse gases into the atmosphere, make adjustments to the changes that are occurring, and figure out ways of reversing the trends of pollution and global warming.
